We Bring Safety To Life
MISSION STATEMENT

We aim to provide quality workforce safety and protection. Our mission is to “Continuously Exceed Our Customers’ Increasing Expectations.” We work closely with distributors to provide innovative and quality products, solid marketing strategies and valuable information to support our customers. Our goal is to enhance worker safety and improve productivity in order to create a more stable working environment.

Adapting to changes in safety needs as well as creating and seeking opportunities for customers are our daily task. We turn customers’ comments into positive action and direct energy. We are here to cover your workers from head to toe and enable your business to grow as you have anticipated. We thank you for your support and for allowing us to continue to serve you.

**GLOSSARY OF TERMS**

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Band Top</td>
<td>Band of material used as a cuff on gloves.</td>
</tr>
<tr>
<td>Binding</td>
<td>Thin fabric sewn on the entire cuff circumference to prevent the cuff material from fraying.</td>
</tr>
<tr>
<td>Chlorination</td>
<td>Process in glove manufacturing that is generally applied to unsupported gloves for hardening the glove interior. This makes the gloves easier to don and helps keep them from sticking together. Chlorination is performed during manufacturing by rinsing gloves in a chlorinated solution.</td>
</tr>
<tr>
<td>Clute Cut</td>
<td>Glove style with a one-piece palm and no seam at the base of the finger. There are seams along the fingers on the inside. Flexible and good for cotton, synthetics, and economical, lightweight leather gloves. Not recommended for heavy gloves.</td>
</tr>
<tr>
<td>Color Coding</td>
<td>Standard glove trade color codes are: Yellow – Extra Small (7); Red – Small (8); Green – Medium (9); Brown – Large (10); Blue – Extra Large (11); Black – XXL (12)</td>
</tr>
<tr>
<td>Cuff</td>
<td>The cuff is the end of the glove, the material extending beyond the palm of the hand to give extra protection to the wrist and forearm. Glove cuffs can include several styles, such as gauntlet, pinking, rolled, safety, serrated, slip-on and wristlet cuffs.</td>
</tr>
<tr>
<td>Cut Resistance</td>
<td>The ability of a glove material to resist cutting through when exposed to sharp surfaces.</td>
</tr>
<tr>
<td>Dipping</td>
<td>A process in glove manufacturing where a form or glove liner is put into an uncured polymer compound. Glove manufacturing may use multiple dips to provide desired glove thickness and other characteristics.</td>
</tr>
<tr>
<td>Fabric Weight</td>
<td>Usually expressed as “8-ounce”, “24-ounce” or some other number. This is the weight of a full square yard of the fabric that the glove is sewn from. So a square yard of fabric used to make an 8-ounce brown jersey glove weighs 8 ounces.</td>
</tr>
<tr>
<td>Flock Lining</td>
<td>Glove lining of fine cotton fibers for moisture absorption and easy donning.</td>
</tr>
<tr>
<td>Full Lining</td>
<td>A “glove within a glove,” the lining covers the entire interior surface of the glove.</td>
</tr>
<tr>
<td>Gauntlet Guff</td>
<td>A 4 to 4 ½ inch wide band of bonded material sewn to a glove as a cuff. Gauntlet cuff gloves are designed to be removed quickly if necessary.</td>
</tr>
<tr>
<td>Interlock Lining</td>
<td>The inner glove is made of lightweight cotton interlock knit fabric.</td>
</tr>
<tr>
<td>Jersey Lined</td>
<td>The glove is lined with brushed cotton fabric.</td>
</tr>
<tr>
<td>Kevlar®</td>
<td>The registered trademark for a light, strong synthetic fiber, developed by DuPont. It is 5 times stronger than steel, yet at the same time lightweight, flexible and comfortable. Its resistance to chemicals, heat, flames, cuts, and breaking makes it one of the best protective materials for gloves.</td>
</tr>
<tr>
<td>Keystone Thumb</td>
<td>Type of inset thumb on full-leather glove patterns. Provides additional wear plus superior movement and comfort. Found mostly on driver’s gloves.</td>
</tr>
<tr>
<td>Knit Wrist</td>
<td>A knit wrist is a stretch-knitted cuff, typically made from cotton, used to protect the wrist and hold the glove in place securely. Also excellent protection against particles falling into the glove.</td>
</tr>
<tr>
<td>Knuckle Strap</td>
<td>A band of leather across the back of a glove covering the knuckle area to provide additional bump protection.</td>
</tr>
<tr>
<td>Latex</td>
<td>Natural rubber product that offers barrier protection to guard against contaminants and chemicals. Stretches for comfort. Synthetic materials are frequently stiffer than latex, hence less comfortable to wear. Latex gloves are usually less expensive than synthetic rubber gloves.</td>
</tr>
<tr>
<td>Nap</td>
<td>In fabric gloves, the loose ends of woven fibers that appear fluffy. Nap-out on chore gloves, nap-in on cotton flannel styles.</td>
</tr>
<tr>
<td>Material</td>
<td>Description</td>
</tr>
<tr>
<td>--------------------------</td>
<td>--------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Neoprene</td>
<td>Synthetic rubber with a high chemical and heat resistance. Provides superior support, flexibility, warmth and impact protection.</td>
</tr>
<tr>
<td>Nitrile</td>
<td>Nitrile gloves are manufactured using synthetic latex, contain no latex proteins, and are three times more puncture-resistant than natural rubber, and have superior resistance to abrasions.</td>
</tr>
<tr>
<td>Nylon</td>
<td>Synthetic fiber that is lightweight, exceptionally strong, resilient and abrasion-resistant. It is easy to wash, fast-drying and resists shrinkage, wrinkling and damage from oil and many chemicals.</td>
</tr>
<tr>
<td>Polymer</td>
<td>Material that can be liquefied for use as a coating on gloves, such as PVC, vinyl, neoprene, nitrile, or rubber.</td>
</tr>
<tr>
<td>Polypropylene</td>
<td>Economical, tough, heat-resistant material that offers high tear resistance plus excellent resistance to organic solvents, degreasing agents, acids and alkalis. Lightweight, non-toxic, resistant to staining, retains flexibility and has a low moisture absorption rate.</td>
</tr>
<tr>
<td>Polyurethane (Poly)</td>
<td>Synthetic material with high abrasion resistance, chemical-resistance and flexibility. Polyurethane offers excellent wear properties, flexibility and elastic memory. It is resistant to oils, solvents, fats, greases and gasoline and will remain flexible down to -90°F and in hot water up to 175°F.</td>
</tr>
<tr>
<td>Puncture Resistant</td>
<td>Due to their inherent construction, conventional materials such as cotton, leather, and nyons are unable to stop sharp objects from penetrating. Puncture-resistant products provide superior puncture protection, utilizing a variety of different technologies such as an Aramid liner or metal mesh.</td>
</tr>
<tr>
<td>PVC (Polyvinyl chloride, known as Vinyl)</td>
<td>PVC protects against a broad range of low-hazard chemicals. It has high strength, good weather resistance and retains its shape. It is non-toxic and has good electrical insulating properties.</td>
</tr>
<tr>
<td>Reversible Gloves</td>
<td>Almost always made from a jersey material with a single seam around the entire periphery and a separate cuff sewn on as the last step. Reversible styling enables the wearer to wear the glove on either hand.</td>
</tr>
<tr>
<td>Rubberized</td>
<td>A term used to describe the bonding of material layers in a glove cuff with rubber cement.</td>
</tr>
<tr>
<td>Safety Cuff</td>
<td>A 2- to 2 ½-inch-wide band of bonded material sewn to a glove as a cuff, sometimes with a slit opening on the side. Safety cuff gloves are designed to be removed quickly if required.</td>
</tr>
<tr>
<td>Shoulder Split</td>
<td>This suede leather comes from the shoulder area where the hide is less uniform in density and appearance. The result is a less-durable, but more affordable leather.</td>
</tr>
<tr>
<td>Starched Cuff</td>
<td>Two layers of fabric laminated and stiffened with starch, used as a band or safety cuff.</td>
</tr>
<tr>
<td>Straight Thumb</td>
<td>A glove thumb that normally lies straight with the index finger. Common to most fabric gloves and drivers gloves.</td>
</tr>
<tr>
<td>String Knits</td>
<td>Fabric gloves or sleeves fabricated using a machine to knit the product in one piece rather than sewing pieces of material together.</td>
</tr>
<tr>
<td>Supported Gloves</td>
<td>Chemical-resistant coating over a cloth shell or lining.</td>
</tr>
<tr>
<td>Tensile Strength</td>
<td>In leather, tensile strength is important. Leather has most of its tear resistance in the split portion of the hide due to the three-dimensionally interlocking fibers. Grain leather has a low tear resistance due to the vertical fiber structure.</td>
</tr>
<tr>
<td>Terry Cloth</td>
<td>Poly/cotton material blend tough enough to hold up to the demands of a work glove, yet soft enough to wipe sweat and debris away from your face. Terry cloth can absorb up to 27 times its own weight in water.</td>
</tr>
<tr>
<td>Unsupported Glove</td>
<td>A glove with no fabric lining, made by dipping a mold into liquid latex or plastic. The glove is created when the material solidifies and is removed from the mold.</td>
</tr>
<tr>
<td>Wing Thumb</td>
<td>Glove construction that angles the thumb diagonally across the palm. Allows good flexibility with no seams on the palm side to obstruct work or cause fatigue. Improves comfort similar to inset thumb designs. Common on welding, drivers', leather palm, and ergonomic gloves.</td>
</tr>
</tbody>
</table>
**General Patterns**

- **Gunn**: Extends glove life keeping seams out of work area.
- Available in continuous and wing thumb.
- Made in leather palm and all leather.
- **Clute**: Seams on back of glove reduce splitting.
- Holds work area more tightly to palm.
- One piece palm.
- Made in cotton and leather palm styles.
- **Reversible**: Gunn pattern with thumb out of side.
- Gloves can be worn on either hand.

**Leather Palm Glove Features**

- **Straight Thumb**: Continuous full leather thumb.
- Seam around thumb
- **Keystone Thumb**: Thumb set-in as a separated piece.
- Positioned naturally for maximum comfort.
- Thumb seam is reinforced with extra stitching
- **Wing Thumb**: Thumb out to side.
- Welts added to the seams for strength.

**General Cuff Styles**

- **Knit Wrist**: Provides comfort and a snug fit.
- **Band Top**: For easy removal and good circulation.
- **Safety Cuff**: Side slit enables wearer to throw off glove quickly.
- Comes in 2-1/2” & 4-1/2”.
- **Gauntlet**: Easy removal and holds tucked sleeve in glove.
- **Slip On**: Easy removal.
**Measuring For Proper Fit**

Without a proper fit, gloves can be clumsy to work with, uncomfortable, cause hand fatigue, and ultimately be hazardous. When measuring for proper fit, you should consider two primary factors - length and hand size:

To find out your glove size, measure (in inches) around your hand with a tape measure across your palm. You should use your dominant hand, the right if you are right-handed, and the left if you are left-handed.

**Glove Size Equivalents**

Some manufacturers indicate glove sizes by number and others by letters standing for Small, Medium, Large, etc. We always indicate the size of a pair of gloves the same way the manufacturer does. Use the table at the bottom to translate between “letter sizes” and “number sizes”.

### Glove Applications:

- **Coated Machine Knit Gloves**: Agriculture and Veterinary, Industrial and General Use, Food Service, Food Processing
- **Cotton Gloves**: Automotive, Assembly, Food Industry, Inspection, Industrial, Parts Handling and General Use
- **Cut and Sewn Gloves**: Industrial and General Use, Janitorial, Sanitation and Laboratory
- **Cut Resistant Gloves**: Agriculture and Veterinary, Industrial and General Use, Food Service, Food Processing
- **Disposable Gloves**: Industrial and General Use Gloves
- **Exam Gloves**: Food Service, Food Processing, Agriculture and Veterinary
- **Heat Resistant Supported Gloves**: Food Service, Food Processing
- **Kevlar Gloves**: Assembly, Metal work, Cut Protection, Heat Insulation Work
- **Latex Exam Gloves**: Industrial and General Use, Janitorial, Sanitation and Laboratory, Medical, Dental, EMS
- **Latex Gloves**: Automotive, Beauty & Nail Industry, Food Processing, Food Service, Industrial and General Use, Agriculture and Veterinary
- **Leather Gloves**: Agricultural, Construction, Cabling, Foundry, Industrial, Driving
- **Machine Knit & Coated Knit Gloves**: Agriculture and Veterinary, Industrial and General Use, Food Service, Food Processing
- **Nitrile Exam Gloves**: Industrial and General Use, Janitorial, Sanitation and Laboratory, Medical, Dental, EMS
- **Nitrile Gloves**: Automotive, Food Processing, Food Service, Industrial and General Use, Agriculture and Veterinary
- **Nylon Gloves**: Inspection, Parts Assembly, Pharmaceutical, Industrial on Low Lint & High Tinsel Strength Work
- **PE Disposable Gloves**: Food Processing, Food Preparation Service
- **Polyurethane Gloves**: Electronic, Parts Handling, General Assembly, Metal Stamping, General Purpose
- **Supported Gloves**: Industrial and General Use, Food Service, Food Processing, Janitorial, Sanitation and Laboratory, Agriculture and Veterinary
- **Synthetic Leather Gloves**: Agricultural, Construction, Cabling, Foundry, Industrial, Driving
- **Terrycloth Products**: Food Service
- **Unsupported Gloves**: Industrial and General Use, Food Service, Food Processing, Janitorial, Sanitation and Laboratory, Agriculture and Veterinary
- **Vinyl Exam Gloves**: Medical, Dental, EMS
- **Vinyl Gloves**: Food Processing, Food Service, Industrial and General Use, Agriculture and Veterinary

GOAT SKIN MECHANIC GLOVE

- Hook & Loop (Velcro) Closure, Fluorescent Yellow
- Unlined
- Kevlar Sewn
- TPR Knuckle Guards
- Cut Resistant
- Size: S, M, L, XL
- 120 Pairs / Case

THE GOBLIN

Major Gloves Goblin Glove is suitable for precision as well as heavy duty work. The TPR (Thermal Plastic Rubber) on the knuckle and fingers protect from impact.

The gloves offers good dexterity and reduces user fatigue. High density helps reduce tremor impact and the palm is protected with Kevlar thread stitching to ensure durability.

GOLIATH (IMPACT RESISTANT/ HI VISIBILITY)

Major Glove’s Goliath glove offers high dexterity and unparalleled grip with no cost to protection. The TPR (thermal plastic rubber) on the back, knuckles & fingers protects against impact. Not only does the foam lining strengthen the composition of the glove but it is shielded by synthetic leather. The Neoprene cuffs offers a snug fit. The silicone pads offer superior grip, and along with the foam lining, protect the hands from impact.

NEW

33-5001
ANTI-VIBRATION MECHANIC GLOVE

- Hook & Loop (Velcro) Closure
- Hi Viz Orange
- Silicone Pads
- Foam Lining

Kevlar Thread

Fiber Glass

Lycra is a type of synthetic elastic fabric and fibre used for tight-fitting garments.

Fiber glass is a material consisting of numerous extremely fine fibers of glass.

It is also known as fiber reinforced polymer made of a plastic matrix reinforced by fine fibers of glass.

Lycra is a type of synthetic elastic fabric and fibre used for tight-fitting garments.

Kevlar® - The registered trademark for a light, strong synthetic fiber, developed by DuPont. It is 5 times stronger than steel, yet at the same time lightweight, flexible and comfortable. Its resistance to chemicals, heat, flames, cuts and breaking makes it one of the best protective materials for gloves.

USE THIS SIMPLE TECHNIQUE TO DETERMINE PROPER GLOVE SIZE

Using a tape measure, measure completely around the hand at the fullest point, excluding the thumb. Use the chart below to convert the measurement to the proper glove size.

<table>
<thead>
<tr>

- Size: One Size Fits All
- 6 Dozen / Case
Each glove has a different heat resistance capacity. Hot mill gloves are needed not only in the manufacturing units but also in the households. The need of type of glove totally depends on the work to be done with that. For residential purposes the gloves are similar to heat resistant gloves but they are designed for light duty. Hot mill gloves are also needed in the manufacturing sectors such as chemical products, paints, surgical instruments, hospitals etc. The gloves are needed to do the work more conveniently and efficiently without any difficulty.

3 CLASSES OF APPAREL:

CLASS I
Lower visibility requirements in environments where traffic doesn’t exceed 25MPH.
Examples of workers in CLASS I:
- People retrieving shopping carts from parking lots
- Workers exposed to warehouse equipment traffic
- Sidewalk maintenance workers

CLASS II
Required when worker’s attention is distracted from coming traffic and tasks are done where traffic speed is between 25-50MPH.
Also intended for use in work places where greater visibility is required and when inclement weather conditions and complex background is present.
Examples of workers in CLASS II:
- Accident site investigators
- Airport baggage handlers
- Airport ground crews
- Cargo loading operators
- Emergency response crews
- Forestry operation workers
- High volume parking crews
- Law enforcement personnel
- Railway operators
- Recycling operators

CLASS III
Required where traffic speed exceeds 50 MPH, also where high risk tasks are performed and where the workers must be easily identifiable as a person through a full range of motion at a minimum of 390 meters (1280 feet). Night crew are especially required.
Examples of workers in CLASS III:
- Emergency response crews
- Survey teams
- Utility workers
- Roadway construction workers

ANSI / ISEA 107-2004 STANDARD
ANSI stands for American National Standards Institute. Together with ISEA, Internation Safety Equipment Association developed a standard for high-visibility clothing. They are non-governmental agencies but this particular standard has been adapted by many states. It establishes many details used in the production for high visibility garments. There are 3 classes of apparel involved.
GENERAL PURPOSE MESH VESTS

**PP MATERIAL**

**SPECIFICATION:**
Spunbonded polypropylene is a lightweight, breathable fabric that provides economical protection against non-hazardous, grimy-work environment applications.

**APPLICATION:**
Spunbonded polypropylene is appropriate for wear in the non-toxic workplace and is a low-cost solution for protecting workers in dirty environments.

**MICROPOROUS MATERIAL**

**DESCRIPTIONS:**
1. Against radioactive contamination.
2. Anti biological hazard & infective agents.

**APPLICATION:**

**SMS MATERIAL**

**DESCRIPTION:**
1. Higher breathability.
2. Good protection.
3. Excellent particle barrier.
4. Stitch with Tape Seam.

**APPLICATION:**
Asbestos Handling, Automotive, Civil Protection, Construction, Decorative Work & Waste Management.
PP COVERALL
00-8052 - STANDARD WEIGHT

Terms, Conditions & Additional Services

- **We Ship**
  We Ship F.O.B. origin, best way unless otherwise requested. Handling charges maybe added to your order. Items temporarily backordered will be shipped upon request only.

- **Terms**
  N30 days to accounts with established credit. Open account is available to qualified customers.
  We accept Master Card, VISA, Amex, and Discover. Service Charge will apply.

- **Inventory**
  Not all items represented in this catalog are in stock. In limited situations, some items may need to be purchased in vendor’s standard packaging. In other words some items require MOQ.

- **Returns & Exchange**
  Items to return or exchange must be done within 10 Business Days after received & maybe subject to 10% Restocking Fee. Please contact us for a Return Authorization Number prior to return. Special order items and custom made products are non-returnable except for defective quality. Shipping charges should be prepaid unless otherwise arranged in advance. All merchandise must be carefully packed and will be subject to charge if not in saleable condition.

- **Damage & Shortage Claims**
  We give great attention to processing, checking and packing your order. On rare occasions, a package may be damaged or lost in transit. If a UPS or common carrier shipment is damaged, please note the damage on the delivery receipt and contact us for assistance with filing a claim.

- **Limited Warranty**
  We make no representation or warranty, expressed or implied, arising out of, or in connection with, the sale, manufacture, delivery or use of any product offered in this catalog or by other means.

- **Blanket Purchase Orders**
  Your blanket purchase order instructs us to ship your frequently used safety products to you on a regular basis. You just tell us when & where you need the product shipped, and the quantities needed. One purchase order is all you need to save time and inventory space. Call us for more details. Some restrictions may apply.

- **Customized Quotes for Volume Purchase**
  Give us a call and we will provide you a special quote for your special volume purchase.

- **Electronic Fund Transfer/Direct Deposit**
  We now accept Electronic Fund Transfer(EFT), and Direct Deposit. Call us to make arrangements.

- **Mail / Email / Fax Order Forms**
  Please call us, order forms are available for you to use.

- **Hangtags**
  We offer hang-tagging service. All hang tags are with UPC codes, please contact us for details.

- **E-Catalog**
  Browsing our products is just a click away. Our user-friendly interface allows you to find what you are looking for. Please visit us at www.MGgloves.com.

- **Drop Shipments**
  Our drop shipment service will save you time & money, it can be done by our blind shipment Bill of Lading or your packing slip if preferrable.

- **Direct Importing**
  For any high-volume distributors looking for great value without compromising quality, direct importing is the key to decrease your costing. Don’t forget the added value for direct import on private labeling & banding service.
